

# Ghoster Coaster

1. First, use a shading tool or wood gouge to shave out the lines of the mine cart and wheels.
2. Next, shave the outline of the track and mine opening.
3. Use a carving saw to cut out the broken boards, face, and outline of the ghost in the mine car.
4. Carve the boards on the track and the side of the car and wheels.
5. Finally, carve out the floating ghostly friends.

All areas of this design could be cut through rather than shaved. The choice is up to you!
